EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Terryence Chapman on 8/13/2009 per below.

IN THE CLAIMS

- a) Claim 1, in lines 27-28, -- "discharging and recovering a flow consisting essentially of carbon dioxide gas from the calciner" was replaced with discharging a flow of carbon dioxide gas substantially free of contamination--.
- b) Claim 1, line 29, paragraph '(i)' was renumbered as -(j)--
- c) Claim 1, after line 28, --(i) recovering said flow of carbon dioxide gas substantially free of contamination;-- was added as new lines.
- d) Claim 1, line 31, pararaph '(j)' was renumbered as -(k)-
- e) Claim 1, line 32, step (i) was replaced with —step (j)--
- f) Claim 1, line 34, paragraph '(k)' was renumbered as -'(I)'-
- g) Claim 17, line 45, "consisting essentially" was deleted.
- h) Claim 17, line 46,---substantially without contamination—was added after 'dioxide'.

Allowable Subject Matter

2. Claims 1-17 are allowed.

The following is an examiner's statement of **reasons for allowance**:

A process and an apparatus for capturing and recovering carbon dioxide substantially and sulphur dioxide from combustion of a carbonaceous fuel and from calcination; combusting the minor proportion of the flow of fuel in the calciner in the presence of the solids flow separated the flue gases of the combustion; convert the calcium carbonate in the solids flow into calcium oxide and carbon dioxide gas; discharging and recovering a flow of carbon dioxide gas substantially free of contamination after the calcination.

The prior art of Morin (USP 5,662,051) and Moss (USP 4,738,207) discloses such combustion and heat reaction process in sequence but does not disclose the calcination process so as discharge and recover carbon dioxide gas substantially at the end of the calicination. The combustion process also does not disclose the separation of solid from the flue gas flow so as to be calcinated after the combustion process. The combination of the two prior art does not teach the claimed limitation of recovering carbon dioxide gas substantially free of contamination.

Conclusion

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
